Releases

Version 1.4.2 - 03/03/2023 (Sprint 24: Haugspori- Sprint 28: Austri)

What's new

- Users can now have menu items read to them.

General improvements and fixes

- Notes being edited are added to the document when the user starts scrolling.
- Notes and Text Documents now use the same default font.
- Voice Selection Menu remains visible for a bit longer when the mouse cursor leaves the menu.
- Angular update to v15.
- Autorecover toggle now works again and this does not change the status of 'Read tooltips' toggle anymore.
- Page range validation is now fixed for OCR on file.
- Audio tooltips no longer overlap each other.
- Read Selected Text no longer stops highlighting at the end of a line.
- Spellchecker and Word Prediction can now be switched of again in Settings.
- Erased markings are no longer duplicated in the Summary.
- Erased markings are no longer included in the Summary.
- Users can now paste images on ChromeOS and Mac.
- Scrolling in Dual Pane mode now works on Mac.

eXamode improvements and fixes (only applicable for pilot schools)

- Spellchecker and Word Prediction settings are disabled when that functionality is blocked.
- Unlock and Access code columns have been switched in the Test Overview.
- Browsers no longer ask to remember eXamode codes.
- eXamode now warns supervisors when trying to edit a file that no longer exists on OneDrive.
- CTRL ESC no longer allows users to bypass Kiosk Mode.
- eXamode comments are now saved.
- eXamode now warns supervisors when a Test has 0 duration.
- eXamode no longer allows supervisors to set invalid dates for a Test.
- Test file names can no longer exceed the maximum length of 60 characters.

Version 1.4.1 - 16/12/2022 (Sprint 22: Durnir - Sprint 23: Dunyerr)

What's new

- Bullet lists are now supported in the Text Editor.
- Subscript and superscript are now supported in the Text Editor.

Improvements

- The extraction options "Keep color" and "Keep structure" are both on by default and are remembered across devices.
- Dual pane mode now also works on smaller screens.
- Zoom button can now be used in dual pane mode.
- The bottom taskbar is now always visible on tablets.
- A toaster is shown now when no text was found using the Search text tool.
- Notes cannot expand beyond the borders of the document anymore.

Fixes

- Documents with hidden text can be read again.
- Autorecover functionality is back again.
- In the Cloud dialog the icons of some file types are shown now during copy / paste action.

Version 1.4.0 - 01/12/2022 (Sprint 4: Radspakr - Sprint 22: Durnir)

What's new

- Users can now manage Favorite folders.
- Voice settings can now be listened to before applying them.
- Tooltips can now be read aloud by hovering.
- Settings can now be exported and imported.
- Text documents can now be marked with various colours.
- Microsoft Word documents can now be opened on Chromebooks.
- Opening supported MS Office files now works on devices that don't have MS Office installed.

Improvements

- Internal optimization to improve performance.
- OneDrive errors are now shown in a user-friendly way instead of the raw OneDrive error.
- All notifications that do not require user interaction have been replaced by toasters.
- All notifications that require user interaction have been replaced by dialog screens.
- Voice names are now identical in the Voice List and Settings.
- Voices are now displayed with their region.
- English voices are now grouped per region (USA, UK, Others).
- PowerPoint and Excel files now show an icon in Google Drive.
- Restrictions on Google Drive Files & Folders now disable those functions in the Cloud dialog too.
- The following voices have been restored:
  - Stephanie (GB)
  - Ava (US)
  - Noelle (US)
  - Tom (US)
  - Zoe (US)
- Summaries now only use the original text and line breaks instead of copying font information.
- Autorecovery storage efficiency has been improved.
- The zoom button is now available in both panes in dual pane mode.

Fixes

- For some languages the Voice list no longer expands beyond the borders of the screen.
- Sentences split across lines are now read as a single sentence.
- Better detection of reading order.
- Text is no longer skipped while reading.
- Switching tabs while connecting to a Cloud Drive no longer shows the Cloud Drive as connected when it isn't.
- General Settings buttons no longer extend beyond screen limits for the French UI.
- Zoom buttons are no longer removed on smaller screens.
- Creating summaries of large documents no longer get stuck.
- Renaming a cloud based file no longer adds an extra extension.
- Files can now be copied to the root folder of a cloud drive again.
- Selecting more than 3000 characters with Audiomaker now shows an error.
- Shared Folder shortcuts now appear when using Google Drive.
- Adding a word to a word list no longer causes an error.
- The first word is no longer capitalized when it is dictated in the middle of a sentence.
- Saving an rtf file with an embedded image no longer breaks the image.
- Numerous updates and tweaks to the Text Editor.

Version 1.3.8 - 16/11/2022 (Hotfix)

Fix

- Corrupted indexed.db can now be reset using a dedicated URL.

Version 1.3.7 - 28/Mar/2022 (Voice Update)

What's new

The following voices have been added:

- English: Tessa (South African), Sangeeta (Indian), Rishi (Indian), Moira (Irish), Evan (US)
- Russian: Katya, Yuri, Milena
- Ukrainian: Lesya

The following voices have temporarily been removed:

- Stephanie

- Ava (US)
- Noelle (US)
- Tom (US)
- Zoe (US)

Version 1.3.6 - 15/Mar/2022 (Sprint 2: Ginnarr)

Improvements

- AutoRecover warning on iOS no longer suggests using Chrome when using Chrome.

Fixes

- All documents opened with AutoRecover no longer get stuck on the loading message.
- Speech Recognition now works for all types of PDF.

Version 1.3.5 - 24/Feb/2022 (Sprint 1: Bafurr)

Improvements

- Performance on low-end Chromebooks has been improved:
  - Opening files from Cloud Drives is now much faster.
  - Saving PDFs no longer cause low-end Chromebooks to become unresponsive.
- The Saving Document notification now appears immediately when saving a file.
- The new Google Drive Consent screen will be shown each time users log in to Google Drive until the requirements have been met.

Fixes

- Opening complex PDFs no longer gets stuck on "Preparing page" notification.
- Several errors in saving to Google Drive have been eliminated.
- Saving to Google Drive no longer risks losing recently added Notes on Chromebooks.
- Saving to Google Drive no longer risks creating a blank document.
- Saving Extractions to Google Drive no longer hangs on low-end Chromebooks.

Version 1.3.4 - 28/May/2021 (Sprint: Gimli)

Improvements

- The reading cursor is not set anymore when using marker or eraser.
- The eraser button is now underlined when active like all other buttons.
- The text from which the markings will be removed is now visualized in light grey while selecting this text with the eraser.
- Files with extension .KES can be opened now (cfr. .kes).
- Files with extension .SEK can be opened now (cfr. .sek).

Fixes

- Files with extension .doc are removed from the supported file list since they are not supported.
- Files with extension .odt are removed from the supported file list since they are not supported.
- RTF files can be opened again.
- Selection modes now keep working after switching selection modes.
- Shared folders can be opened again in OneDrive.
- Docx files can be opened again in Dropbox.
- Dedicon files can be opened again.
- No more "Guest" tooltip is shown when hovering over marked text.
- Deleted marked text is not shown anymore in Summarize.
- It is now possible again to delete markings.
- Correct error message is shown now when trying to open a file with 2 extensions.

Version 1.3.3 - 19/April/2021 (Sprint: Grimr)

What's new

- Creating Notes has been reworked. Users can now choose to place a single Note or multiple Notes.
- Users can now restore their settings to default values.

Improvements

- Pressing F3 places the cursor in the Search Dialog.
- Pressing F3 while editing a Note no longer shows the Search Dialog.
- The number of search results is now shown.
- Search box appearance on iPad Air 2 has been corrected.
- Close Document Menu item is disabled when there is no open document.
- Note Font settings are remembered.
- The Settings dialog has been reworked :
    - All Tabs are now indicated by icons with their description in tooltips.
    - Speech, Reading Bar and General Settings have received new icons.
    - General and Cloud Settings have switched places.
    - AutoRecover settings have moved to Cloud Settings.
    - Conditional Settings are disabled instead of hidden.

Fixes

- Switching between panes in Dual Pane mode no longer locks the user in Rectangle Reading Mode.
- Editing a Note in Dual Pane mode no longer gets stuck in Edit Mode when also editing a Note in the other Pane.
- Adding a Note to a document that is being opened in Dual Pane Mode no longer gets stuck in Preparing Document.
- Toolbars no longer move out of the browser window during resizing.
- Reading no longer unexpectedly stops during continuous reading.
- Reading no longer stops when encountering ALT tags.
- Spellcheck suggestions appear again when editing Notes.
- A document no longer appears in the wrong pane when switching panes while the document is loading.
- Notes no longer become Sticky Notes when edited after creating a Sticky Note and vice versa.

Version 1.3.2 - 18/March/2021 (Sprint: Northri)

What's new

- Users can open .xslx files as a pdf.
- Users can open .pptx files as a pdf.
- Users can now use Paused Reading with configurable pauses between words.
- It is now possible to sort files in a Cloud Drive (Name, Size, Date Modified).
- The Sensotec logo has been replaced with the Alinea Suite Logo (not for K3000user.sensotec.be).
- Cloud Drives now give a warning when the drive is full.
- Users can now delete all empty Notes in a document with a single action.

Improvements

- Pronunciation of words with single quote/apostrophe has been improved.
- Empty Notes have been made wider.
- Password dialog layout and style have been improved.
- F3 shortcut added to launch the Search function.
- Cursor is placed in the search field when the user clicks the Search button.
- Search bar visibility in Dark Mode has been improved.
- The account used for a cloud drive now has its own icon.
- Toolbar Button behaviour has been simplified.
- Grey border around opened PDF documents has been removed.
- PDF To KES menu items in Text Editor are now disabled.

Fixes

- Deleting a Text Note no longer just hides it.
- AudioMaker can now convert text spread over page boundaries.
- The Single/Dual Page toggle no longer disappears on some screens.
- Folders with a . in the name no longer appear to change the file type information.
- The PDF extension is no longer dropped when saving a converted docx file to a Cloud drive.
- Shortcut keys no longer need the document to have focus.
- Various fixes to Text Editor Reading.

HotFix 1.3.1 - 02/March/2021

- Save to Cloud no longer behaves as Save As To Cloud.

Version 1.3.0 - 22/Feb/2021 (Sprint: Sindri)

What's new

- Users can open .docx files.
- Users can search a PDF for a given text string.
- Editor documents can now use the OpenDyslexic font.
- Cloud Storage has been extended with support for OneDrive for Business.

Improvements

- Users can create empty Notes in a PDF.
- Highlights now use a solid colour.
- Easier to use Speech Recognition in Notes.
- The order of Cloud Drives is now the same in Settings and the Open/Save to Cloud Dialog.
- The login page is now shown in the browser's language on a user's first visit.
- The Bottom Taskbar is displayed even when there is no open document.
- Mobile devices have a much simpler Bottom Taskbar.
- The Main Taskbar has been adjusted for use on mobile devices.
- The Settings Dialog has been adjusted for use on mobile devices.
- Closing the browser tab will warn about unsaved changes regardless of AutoRecover Settings.
- Closing the document tab will warn about unsaved changes regardless of AutoRecover Settings.
- Logging out will warn about unsaved changes regardless of AutoRecover Settings.
- Safari users will get a warning that AutoRecover cannot be used with Safari.

Fixes

- OCR from device works for both versions.
- Tapping the Main Menu icon now closes the Main Menu.
- AutoRecover is no longer disabled when the actual used storage space was exactly zero.
- The Reading Mode Toolbar is now fully displayed on mobile devices.

Version 1.2.2 - 9/Feb/2021 (Sprint: Andvari)

What's new

- Language on the Logon screen is remembered.
- Page Up & Page Down keys can now be used for scrolling.
- Users can now select a file from a list of files they most recently used.
- The UI now uses the language in the user's profile until the user changes the UI language.
- Speech during Word Prediction can now be controlled via Settings.
- Speech during Spell Check can now be controlled via Settings.

Improvements

- Word Prediction UI has been adjusted for use on Mobile Devices.
- Main Menu now closes after tapping on a menu item.
- Floating toolbars are now controllable with a touch interface.
- Floating toolbars can now be docked to the left edge of the screen.
- Floating toolbars can now be displayed horizontally by double clicking next to the little cross.
- AudioMaker now uses the current reading speed.
- The text editor toolbar UI has been adjusted for use on Mobile Devices.

Fixes

- Audio files can now be saved to Cloud Drives.
- Cloud Provider dropdown no longer shows disconnected providers.
- Google Drive no longer shows an Execution Error on MacBook and iPad (Safari).
- Trailing spaces in a folder name no longer cause an error.
- Files without .pdf extension no longer receive that extension when saved.

- Save to Dropbox no longer acts as Save to Dropbox as.

HotFix 1.2.1 - 15/12/2020

- Header issues no longer prevent opening Dedicon files

Version 1.2.0 - 1/Dec/2020 (Sprint: Radsvidr)

What's new

- Cloud drives now remember the last used folder.
- Settings now has a Cloud Tab allowing user to activate/deactivate Cloud providers.
- Page by Page navigation mode added and configurable in settings.
- Settings - About now shows a link to the release notes.
- Main Taskbar automatically adjusts for different screen widths.
- Main Menu automatically adjusts with Main Taskbar.
- GSuite for Education shared drives are now visible.

Improvements

- Browsing Google Drive is now much faster.
- Very long filenames are now completely visible, using multiple lines if necessary.
- Very long path names are now shown on one line with three dots showing the intervening folder names.
- Page settings such as Zoom Factor are now applied immediately after opening a document.
- Download to Device menu item is now disabled when there is no active document.
- Notes, Markers and Drawing tools are disabled in the Editor.
- Page rendering has been improved causing less situations where scrolling would show blank pages.
- Various tweaks and changes to increase performance.
- Login errors no longer appear outside the screen on mobile devices.
- Existing Session warning no longer extends outside the screen on mobile devices.
- Users can no longer rename the Audiomaker buttons.

Fixes

- Continuous Reading no longer stops reading single page documents.
- Closing the Notes toolbar no longer forces default Note settings on the last created Note.
- Autorecover no longer waits until scrolling starts to render a page.
- Creating a Note no longer stops the AudioMaker cursor from appearing.
- Voices are now visible in Dark Mode.
- New Tab button is now visible in Dark Mode.
- Inactive Document Tabs are now visible in Dark Mode.
- Autorecover no longer opens an RTF file when changes were made to a saved document.
- Speech speed labels are now translated immediately when switching languages.
- AudioMaker dialog layout and texts have been finetuned for French UI.

Changes

- Dropbox now has production status.
- OneDrive now has verified status.
- Spellchecker and Word Prediction enable/disable now use exact same wording.

Version 1.1.4 - 15/Oct/20 (Sprints: Fafnir, Alfrigg and Dvalinn)

What's new

- The autorecover functionality has been added to prevent data loss.
- PDF and RTF documents are opened at the last known reading position.
- Text and Sticky Notes can now be added to image-only PDFs.

Improvements

- Text Notes, Sticky Notes and Audiomaker now have a custom mouse pointer.
- Clicking outside of a Note now creates a new Note.

- All Files are shown when saving an Audiomaker file to the Cloud.
- The audio file is saved to the default Alinea Audio / K3000user Audio file in the root of the cloud when no folder is chosen by the user.
- The default audio file name is shown in the Save to Cloud dialog.
- Cloud drives now show proper error messages.
- A warning message is shown when trying to open an unsupported file.
- The Delete file/folder dialog now shows a Cancel button instead of a No button.
- A warning is shown when trying to open an RTF file that is already opened.
- Switching from My Drive / My Files to Shared Folders now returns the user to the Root folder.
- An animation is shown while loading Cloud Drive content.
- Users are only warned about unsaved changes when there are unsaved changes.
- Browser storage information is now shown in Settings in the About tab.
- The Zoom Factor has been limited to 1000%.
- The zoom modes (zoom/fit to width/fit to page) and page modes (single page view/dual page view) have been added to the Settings dialog.
- It is easier to see which pane is the active pane.
- Moving taskbars has been made easier.
- The Print item in the Main Menu now works for PDF and Text Editor documents.
- Drawings and markings can now be shared between Alinea Cloud and Alinea Windows.

Fixes

- Audiomaker now works when launched with Rectangle Reading enabled.
- Audiomaker now works when making a new selection.
- New Audiomaker documents show proper names instead of dev information.
- Opening SEK and KES files no longer becomes progressively slower through use.
- It is possible now to create a folder in a folder in Dropbox.
- The size of Dropbox files is correctly shown.
- French and Dutch filenames for a copy of a file are now correct.
- Improved RTF file handling in Cloud drives (MIME Type issues fixed).
- Closing a Document tab no longer leaves the file in local storage.
- The new filename is not ignored anymore when a file with the same name already exists in the target folder.
- The file name field no longer disappears when clicking on a Cloud folder.
- Attempting to overwrite a file now results in a warning message.
- GMail SSO users will now see their Username in Settings.
- Reading aloud a part of the lookup result in Prisma Nederlands no longer creates a loop.
- Dictionary explanations are now readable in all Selection modes.
- The Spellchecker occasionally suggested corrections for the next error. That is fixed now.
- Using Notes doesn't cause the Spellchecker to fail anymore.
- Spaces are no longer randomly added while typing.
- Rectangle Selection no longer reads the wrong text when making two selections in quick succession.
- Highlighting no longer moves faster than it reads in some dictionaries.
- Highlighting no longer moves slower than it reads in some RTF files.
- Google translate doesn't ignore text after a slash anymore.
- The Marker toolbar is no longer shown when the Marker Button has been disabled.
- The Marker Toolbar is no longer active when reviewing Extracted Text.
- The Forgot Password link on the logon page works again.
- Dutch and French translations are now complete for Forgot Password.
- Dark / Light mode text match toggle position now.
- The Open Button is no longer enabled when no file is selected in Open File.
- It is no longer possible to Save a File when no documents are opened.
- The Print menu item is disabled when there are no open documents.
- Choosing Fit to Width no longer forces the Word Prediction window out of view.
- The mouse pointer is returned to the normal pointer after using Rectangle selection.

Changes

- The Print Icon has been removed from the Text Editor.
- The Layout tab in Settings has been moved to the General tab.

Version 1.1.3 - 11/Jun/20

What's new

- OneDrive support has been added.
- With the Audio Maker tool the user can make an MP3 file of selected text. The counter in the bottom toolbar shows the number of selected characters. The limit for the Audio Maker is 3000 characters.

Improvements

- Markers are disabled during selection mode "Read text in rectangle" the same way like it is done in selection mode "Read selection".
- The speech recognition button blinks during recognition to indicate that the recognition is ongoing.
- If the user selects text and uses the speech recognition tool, the selected text will be replaced by the dicated words.
- When dictated text is getting longer in a note, the note is enlarged now so you don't need the slider to see the whole note.
- Some small improvements to the cloud storage system are made.
- Some other small improvements are made.

Fixes

- The search term in the lookup window is not erased anymore when speech recognition is turned off.
- Some small bug fixes are made.

Version 1.1.2 - 08/Apr/20

What's new

- With the speech recognition tool the user can dictate text in 9 different languages instead of typing it. This tool can be used in the text editor, in text and sticky notes and in the search field of the dictionary.
- You can switch to "My Drive" and "Shared with me" files/folders (Google Drive).
- You can switch to "My files" and "Shared" files/folders (Dropbox).
- You can rename, copy, move and delete files/folders (Google Drive/Dropbox).
- You can create new folders (Google Drive/Dropbox).

Improvements

- The hyperlinks of the privacy agreement and the terms of use and the text "All rights reserved" are replaced from the bottom toolbar to the tab About in the Settings and the login screen.
- The i button that linked to the about tab in the Settings is deleted on the top toolbar.
- There is only one show/hide notes button now and this button is always shown on the notes toolbar to simplify the use of it.
- The markers are disabled now during selection mode "Read selection".
- The reading starts faster now.
- Some other small improvements are made.

Fixes

- The cursor no longer changes position when inserting a space after a word with the spell checker enabled. Even with fast typing, the cursor now stays nicely in position.
- You no longer receive a double login request when you log in with the Enter key (instead of clicking the login button). Such a double login request ensured that the user remained logged in with the second session when logging out.
- You can mark after taking notes now.
- You can download a copy of a PDF to the device now.
- You will no longer receive an incorrect "file already opened" message.
- You will now receive a notification if the name you have chosen for your file already exists in that folder. That way you don't accidentally overwrite anything.
- Selecting an existing file name to edit it works fine now.
- There is no unwanted new folder created anymore when saving Dedicon files in Dropbox.

Version 1.1.1 - 24/Feb/20

Improvements

- When opening the lookup window, all dictionaries that are available for the active document language are shown now. For example if the document language is Dutch, following dictionaries are shown:
  - Prisma Nederlands
  - Prisma Nederlands voor de basisschool
  - Prisma Nederlands-Duits
  - Prisma Nederlands-Engels
  - Prisma Nederlands-Frans
- If there is no active document language, the default document reading language that is defined in settings is used.
- There is no need any more for the setting on tab general. Since there is no other general setting right now, the tab "General" is hidden.

Fixes

- Bug when closing conjugations disabled all dictionaries is fixed.

- Bug where shared folders were shown in all sub folders of Google Drive is fixed. The shared folders are only shown in the root folder.
- During reading some words were skipped. This is fixed.

Version 1.1.0 - 04/Feb/20

What's new

- Dropbox support has been added.
- You can add and delete words to the correction list of the spell checker.
- The user can switch spell checker and word prediction on or off by default.
- The user can ignore just one or all words during spell checking.
- The button in the toolbar changes according to the chosen selection mode so it is clear to the user which selection mode is active.
- The selection mode is dependent on the document type (pdf or rtf).
- The selection mode "read the selected text" is now also available in the editor.
- Text can be read on iPads.
- Tooltips are shown now when hovering over the buttons.

Improvements

- The speech is now much faster.
- The play button changes to a pause button immediately after clicking on it.
- Punctuation is now observed when reading in text selection and rectangle selection.
- Selection and Rectangle Reading no longer reads the occasional text fragment twice.
- Reading while typing is now switched on by default.
- The user can now choose multiple typing units at once for reading while typing (in settings).
- The user can delete multiple notes at once by dragging a rectangle around the notes and pressing the trash can.
- Some other small improvements are made.

Fixes

- Some small bug fixes are made.

Version 1.0.0.10 - 09/Dec/19

What's new/Improvements

- The file types "kes" and "sek" were removed from the supported file list in the Alinea in the Cloud version. They are still shown under "All Files".

Fixes

- Selected words in notes were not replaced by the selected word suggestion. This is fixed.
- The reading speed was not saved for some users. This is fixed.
- The Spell check correction list didn't appear for some users. This is fixed.

Version 1.0.0.9 - 02/Dec/19

What's new

- You can set reading speed in more and smaller steps.
- New reading mode: You can read selected text with normal selection (pdf and editor).
- New reading mode: You can read selected text using frame selection (pdf).
- It is possible to perform OCR on the current page of the active pdf document.
- The screenshot reader is added (pdf).
- Spell checking is supported in text notes.
- It is now possible to print Dedicon files. Those files can only be printed in grayscale.
- The current document can now also be closed via the main menu.
- Google translate can be opened even if no document is open.

Improvements

- There is an animation shown during loading and converting documents.

- The Extra tools buttons and the Print PDF menu item are disabled when there is no open document if when there is an RTF document active. These buttons are clickable again when a pdf document becomes active.
- Creating a note is made more intuitive (no possibility to draw a frame anymore).
- The complete reading button area is clickable now.
- Reading conjugations has improved. You can click directly on the play button to read the conjugations from the beginning or you can first click on a conjugation and then on the play button to read from there.
- Double highlighting when reading the dictionary has improved.
- Google Drive: the new entered name retains even if you change the folder.
- The correct tab in the settings window will now open when you click on the i-button.
- The word prediction window opens by default at the top right corner.

Version 1.0.0.8 build 23 - 15/Nov/19

What's new/Improvements

- An icon of the spell checker appears in the taskbar when the spell checker is active.
- The word "Checking" appears next to the icon of the spell checker when text is checked.

Fixes

- Double highlighting in the lookup result was gone. This is fixed.
- Auto scroll didn't work anymore in the lookup result. This is fixed.
- Image in the picture dictionary was only visible when using the scroll bar. Now the image is immediately visible.
- Manually correcting a misspelled word caused all subsequent typed letters to be marked as misspelled. This is fixed.

Version 1.0.0.8 - 14/Nov/19

What's New/Improvements

- French is added to the language selection box on the login page.
- Message "Device Limit Reached" on the login page is removed.
- Logging in no longer shows unclosed documents of the previous session.
- Logout no longer shows blank page when RTF files were open.
- It is possible to perform OCR on a pdf, JPG and PNG file.
- Polish is added as a new reading language.
- The speed of the spell checker is improved.
- It is possible to use the word predictor in the notes.
- Lookup reading does not require placing the cursor in the lookup result anymore. Clicking the play button is enough.
- Google Drive improvements are made.
- The links to the terms of use are dependent on the UI language.
- The hyperlink to the manual depends on the UI language.
- Word prediction dialog is activated when clicking on a word in an editor text.
- The user is able to create, edit and delete sticky notes.
- Improvements of the size of the notes are made.
- Correct dictionaries are displayed depending on the reading language now.
  - If there is an active document: it is dependent on the language of that active document.
  - If there is no active document: it is dependent on the language of settings dialog.
- Turning off the spell checker removes all spellchecker markings.
- Clicking outside a note while editing ensures that the note is added to the document.
- Approval for Google Drive for the Sensotec Webapp is received.
- Double click on a note to go in edit mode is now possible even if the text note button is not active.
- Double click on a note to go in edit mode is now possible even if you are in editing mode in another note.
- The notes toolbar is now shown when you are in edit mode.
- Printed documents are no longer blurred.
- Toolbar buttons are deactivated when closing that toolbar.
- Sensotec and Sprint info reading order and language tags are recognized in PDF and KES files.
- English, French and German word prediction is possible.
- The entire button area is clickable.
- The user gets a warning when current page has no text.
- Some missing strings are added.
- "Upcoming Features" link is removed from the settings dialog.
- The redundant extra print dialog (that was in English) is removed.
- Options "Add to wordlist", "Ignore" and "Ignore all" are removed from the Spell Check dialog.
- Extracted text is shown with a scrollbar if text does not fit on the screen.
- The read while typing feature is added. In the settings the user can choose between characters, words or sentences to be read.

Fixes

- Pause button didn't react when reading was in between two reading units. This is fixed.
- Saving large editor documents does not fail anymore.
- Now it is possible to make an extraction of a KES file that already has markings.
- Ignore zones set with Alinea Windows were read while they should not be read. This is fixed.
- Separate words were sometimes spoken as one word in the lookup tool. This is fixed.
- Language switching went sometimes wrong in reading aloud dictionary lookup result. This is fixed.
- Word prediction was triggered when going to dictionary. This is fixed.
- Closing the Lookup window did not stop reading. This is fixed.
- Lookup showed a system error when certain characters appeared in the word. This is fixed.
- Marking already marked text caused that text to appear multiple times in the extraction. This is fixed.
- The bottom of the text note was not always shown. This is fixed.
- Some toasters didn't disappear automatically after a certain time. This is fixed.
- Reading dictionary read the active document instead of the dictionary explanation. This is fixed.
- Other text styles are no longer seen as a sentence end.
- Printing a document while editing a note no longer shows a "Document Not Supported" message.
- Configuring the styles of drawings didn't work as intended anymore. This is fixed.
- Suggested words in the spell checker were not always spoken aloud when hovering over them. This is fixed.
- The next and previous buttons didn't work as intended. This is fixed.
- The word at the reading cursor was not used for dictionary lookup anymore. This is fixed.
- Markings of marked text were not visible when printing the extraction. This is fixed.
- Buttons are disabled when they cannot be used at that point (f.e. the drawing button when an editor document is active).
- Some other small bug fixes are made.

Version 1.0.0.7 - 16/Oct/19

What's New/Improvements

- Multilingual reading in the dictionaries is possible now.
- The Text note feature is added.
    - If the user holds the mouse pointer over a text note, a word will be marked in grey to indicate that the text note will be read after that word.
    - The user can show or hide the text notes. That way he is able to print the document with or without text notes.
    - The user can show or hide the drawings. That way he is able to print the document with or without drawings.
- The Shared folders of Google Drive are shown in the Google Drive dialog.
- Other small Google Drive improvements are made.
- The user can change the user interface language to French.
- Small user interface improvements are made.
- Some conversion improvements are made.

Fixes

- Some small bug fixes are made.
- No dictionary was found at first attempt. This is fixed.
- There was a delay in starting to speak after not using the web app for some time. This is fixed.
- Window to kick another session sometimes didn't show up. This is fixed.
- Login button occasionally generated double login requests. This is fixed.

Known Issues

- Arabic was removed from the list because of reading order issues.

Coming Soon

- Bug fixing and further optimization of the performance.
- OCR on image PDF documents and other image files.
- Preparing release in the Netherlands.
