Go-box +

Makes TV subtitles accessible to everybody!

Enjoy watching TV thanks to this solution to magnify or read aloud TV subtitles.

Solutions for a visual challenge

Magnify TV-subtitles

TV SUBTITLE READABILITY DRAMATICALLY IMPROVED

As you grow older, your eyesight slowly deteriorates. A common complaint in this regard is that **TV subtitles are no longer easy to follow**. The letters are too small and the texts disappear too quickly to read them properly.

A larger TV screen does not help and sitting closer is not an ideal solution either. What does help is **magnifying the subtitles** on a **contrasting background**. And that is exactly what the Go-box+ does for you!

TV-subtitles
thanks to Go-Box+

Standard
TV-subtitles

WITH THE GO-BOX+, YOU CAN KEEP TRACK OF SUBTITLES

Thanks to this clever device, all **TV subtitles are displayed up to twice the size**.

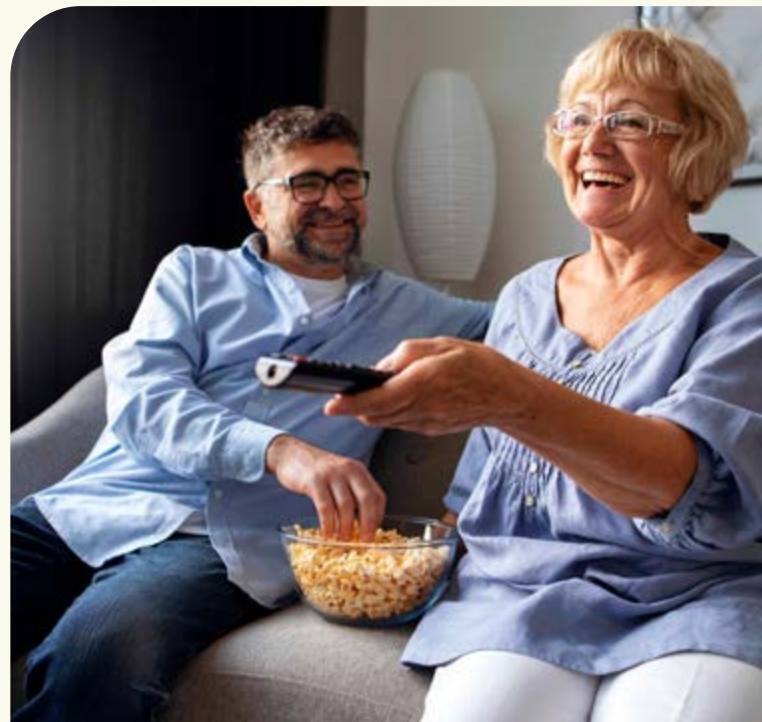

In addition, the Go-box+ provides **more contrast**, for example with yellow letters on a dark background.

Choose yourself the **ideal combination of letter and background color**. This greatly improves the readability of TV subtitles.

MORE VIEWING PLEASURE AND EASY CONNECTION

The Go-box+ automatically tracks the channels you select. Whether it's regular TV programs, deferred broadcast or streaming services like Netflix, ... the subtitles are instantly magnified with the contrast of your choice.

The Go-box+ connects easily between the decoder and the TV and can be set up with the included remote control. After that, no control is needed.

Read aloud TV-subtitles

LET YOUR EARS TAKE OVER

For those who cannot read subtitles on TV at all, the **Go-box+** can also help. It speaks subtitles aloud as well!

No matter whether it's a classic subtitled TV program, a movie on DVD*, a crime serie on Netflix or a recording of a delayed program.

THE BENEFITS AT A GLANCE

- Easy to use: switches automatically when changing channel
- Very easy to connect between the decoder and your TV for a quick start-up
- Reads out all subtitles, including from a DVD*, streaming services such as Netflix and deferred broadcast

*DVD : only Blu-ray or full HD resolution.

REMOTE CONTROL AND READ ALOUD MENU

The Go-box+ comes with a simple remote control with spoken guidance. You adjust the **reading voice** and **reading speed** to your liking.

You decide how the sound of the subtitles is played : through the **TV speaker**, or through **headphones**, so roommates don't have to listen in.

This can also be done using **Bluetooth** so you are free to move around.

For elderly and visually challenged people

Improves readability of TV subtitles

Less eyestrain

NOT ONLY STANDARD TV:

& even more!

“ We speak daily with people who can still actually see well, but who do have problems with the subtitles on TV.

From our expertise, we found something to solve this. We developed a device that magnifies the subtitles up to two times, offers more contrast and even reads the subtitles aloud. This is how we make watching TV enjoyable again for everyone.

The compactness of this box, comparable of a CD-box, ensures its discretion and effortless connectivity. ”
