Vo-box & Go-box

Makes TV subtitles accessible to everybody!

Enjoy watching TV anew thanks to this solution to magnified (Vo-box) or read aloud (Go-box) TV subtitles.

Solutions for a visual challenge

VO-BOX - Magnify TV-subtitles

TV SUBTITLE READABILITY DRAMATICALLY IMPROVED

As you grow older, your eyesight slowly deteriorates. A common complaint in this regard is that **TV subtitles are no longer easy to follow**. The letters are too small and the texts disappear too quickly to read them properly.

A larger TV screen does not help and sitting closer is not an ideal solution either. What does help is **magnifying the subtitles** on a **contrasting background**. And that is exactly what the Vo-box does for you!

WITH THE VO BOX, YOU CAN KEEP TRACK OF SUBTITLES AGAIN

“Vo” stands for “Magnification subtitles,” and thanks to this clever device, all **TV subtitles are displayed up to twice the size**.

In addition, the Vo box provides **more contrast**, for example with yellow letters on a dark background.

Choose yourself the **ideal combination of letter and background color**. This greatly improves the readability of TV subtitles.

MORE VIEWING PLEASURE AND EASY CONNECTION

The Vo-box automatically tracks the channels you select. Whether it's regular TV programs, deferred broadcast or streaming services like Netflix, ... the subtitles are instantly magnified with the contrast of your choice.

The Vo-box connects easily between the decoder and the TV and can be set up with the included remote control. After that, no control is needed.

GO-BOX - Read aloud TV-subtitles

COMPACT, SIMPLE & EASY TO CONNECT

For those who can't read TV subtitles at all, there is now the **Go-box**. This small and clever tool **reads the subtitles out loud!** Of all broadcasts on TV with subtitles, including your movies on DVD*, that crime series on Netflix or a recording of deferred broadcast.

THE ADVANTAGES AT A FIRST SIGHT

- Easy to use: switches automatically when changing transmitters
- Very easy to connect between the decoder and your TV for a quick start-up
- Reads out all subtitles, including from a DVD*, streaming services such as Netflix and deferred broadcast *DVD : only Blu-ray or full HD resolution.
- May be reimbursed by health insurance company

REMOTE CONTROL AND READ ALOUD MENU

The Go-box comes with a simple remote control with spoken guidance. You adjust the **reading voice** and **reading speed** to your liking.

You decide how the sound of the subtitles is played: through the **TV speaker**, through the **Webbox** or through **headphones**. This can also be done using **Bluetooth** so roommates don't have to listen in.

FROM VO-BOX TO GO-BOX +

If your vision deteriorates further, you can choose to have the TV subtitles not only magnify, but also have them read out to you.

The advantages of both devices in 1 !

We can then upgrade the Vo-box to the Go-box, the Spoken subtitles version.

GOOD TO KNOW

The Go-box and the Vo-box are eligible for reimbursement by health insurance companies.

We will arrange the request!

BOTH MODELS ARE ADAPTED TO...

& even more!

“ We speak daily with people who can still actually see well, but who do have problems with the subtitles on TV.

From our expertise, we found something to solve this. We developed a device that magnify the subtitles up to two times, offers more contrast and even reads the subtitles aloud. This is how we make watching TV enjoyable again for everyone.

The compactness of this box, comparable of a CD-box, ensures its discretion and effortless connectivity. ”
